

FOR IMMEDIATE RELEASE

Meet the Evolving Kwik-Wall Company: Offering 10 Week Lead Times for Operable Partitions

Springfield, Illinois, March 23, 2023 - Kwik-Wall, a premier operable partition, and movable glass wall supplier, has recently opened a new manufacturing facility in Mount Pulaski, Illinois. Kwik-Wall's third US facility is fastly transforming the current market's traditionally slow lead times. With the capacity to produce Series 2000 panels up to 51 STC, paired and multi-directional, 3" thick panels, including pass doors and pocket doors, Kwik-Wall is now offering less than 10-week lead times from released shop drawings.

Many contractors and building owners face excessive lead times for folding panel partitions adding unwanted risks to their schedules. However, Kwik-Wall's recent facility expansion coupled with its ongoing engineering expertise has allowed the company to increase production schedules and maintain quality inspections leading to more efficient production and significantly reduced lead times. While some height and finish limitations may affect specific projects, Kwik-Wall's standard production lead times for taller 2000 Series and 3000 Series remain far below competitors in the market.

The new Kwik-Wall facility is located in Mount Pulaski about 30 minutes from the main production facility and has doubled the company's capacity to build day-to-day panels. Supported by the Mount Pulaski community, Kwik-Wall's new team of employees has shown exceptional work ethic ensuring distributors can serve general contractors in a flash.

The 2000 Series panels with a premier 3" panel thickness and a long legacy for quality performance are produced with either steel or gypsum faces and covered with standard vinyl-coated fabrics meeting the performance of any other op wall suppliers. With lead times under 10 weeks, Kwik-Wall is fast becoming the go-to, day-to-day folding panel partition supplier for general contractors and customers needing operable partitions and movable glass walls.

Reduce your risk while meeting all your performance specifications and contractual obligations with Kwik-Wall's high-quality and efficient operable partitions. Find a distributor near you and request a quote on a new project, or convert an existing project that doesn't fit your current project schedule by visiting Kwik-Wall's website today.

About Kwik-Wall Company

Founded in 1961, Kwik-Wall™ Company is a US family-owned operable partition manufacturer that offers a complete line of acoustically rated folding panel partitions and glass movable wall systems from three separate Midwest manufacturing facilities. Kwik-Wall offers a broad range of 3- and 4-inch thick steel and aluminum-framed panel constructions that allows schools, offices, hotels, convention centers, and other commercial facilities to divide and utilize space most efficiently. A member of the U.S. Green Building Council, Kwik-Wall products can contribute to achieving LEED v4.1 project goals especially recycled material content, acoustic performance,

and daylighting. Employing nearly one-hundred dedicated team members, Kwik-Wall Company products are sold and serviced by more than 100 distributor partners throughout North America.
