

HUFCOR SERIES 642 by KWIK-WALL SPECIFICATIONS

Hinged Paired Panels

Top Supported
Center Stack
Paired Panels
Manually Operated
Maximum Height: 24'3" [7391]
Maximum Opening Width: Unlimited
STC Ratings: 52, 54, 56

PRODUCT OVERVIEW:

In June 2023, Kwik-Wall Company obtained the exclusive rights to the HUFCOR 600 Series in North America. HUFCOR is now a brand offered by Kwik-Wall distributors for select project characteristics. Visit www.kwik-wall.com to learn any limitations for using HUFCOR 600 Series products.

Select for Durability and Aesthetics: The HUFCOR 642 offers panel finishes for the ultimate in design flexibility. Even the frames may be color matched to coordinate with the faces. The 642 is a popular choice for hotel meeting rooms, convention centers, commercial facilities, or other high use facilities.

Standard Features: The panels are nominally 4" [102] thick, and have a 16 ga. steel frame. The top and bottom horizontal sound seals are retractable and provide floor clearance (to accommodate out-of-level floors). The retractable seals are Quick-Set™ which means they are easily extended or retracted with only a 1/2 turn of the removable handle. The faces may be covered from a wide selection of vinyl colors and patterns or other materials.

Paired Panels: Select for wall-to-wall space division. Panels are hinged in pairs allowing fast setup. They may be stacked at either or both ends of the track or in a "pocket". One or more pair of panels may be placed anywhere along the track for use as sight dividers.

How to Obtain: HUFCOR brand partitions are sold, installed, and serviced by factory-trained local authorized Kwik-Wall Distributors in the North America and by Gibco Furniture Industry Co. Licensees, Distributors and Affiliates throughout the world.

Delivery: Panels are custom built for your specific project. Lead times vary due to seasonal fluctuations. Check with your Kwik-Wall Distributor for the current schedule.

Warranty: Track and panels are guaranteed for **two years** against defects in material and workmanship.

"Standard" Product Features and Benefits:

Look for these features when comparing similar products.

- Feature:** Protective vertical trim (Available option: no protective vertical face trim.)
Benefit: Trim protects the panel edges and faces plus it provides a handhold when moving panels.
- Feature:** Quick-Set™ Retractable Seals
Benefit: The retractable seals are Quick-Set™ which means they are easily extended or retracted with only a 1/2 turn of the removable handle. No tedious cranking needed to set the seals.
- Feature:** 2" [51] retractable top and bottom seals
Benefit: Retractable seals accommodate out-of-level floor conditions. When retracted, nothing drags on the floor or track when the panels are moved. Panels can be "locked" in place.
- Feature:** Retractable seals exert seal force
Benefit: Provides constant force against track and floor for optimum acoustics even on carpet or other porous floor materials. Maintains panel stability when the seals are set.
- Feature:** Waist high seal activator for quick set retractable seals.
Benefit: Fast, easy seal activation without bending or stooping.
- Feature:** Removable operating handle.
Benefit: Prevents unauthorized operation.
- Feature:** Expanding Jamb Closure (Lever Closure) Panel
Benefit: Exerts 250 lbs [113.4 kg] of force against the fixed wall. The compression creates tight panel joints for optimum sound control.
- Feature:** Interlocking vertical seals
Benefit: Ensures panel-to-panel alignment and prevents sound leaks between panels.
- Feature:** Low profile hinges
Benefit: Safety and aesthetics - no unsightly hinges protruding from the panel faces.

Optional track systems, seals, and accessories enable the standard product to be modified for optimum versatility. See details provided or ask your Kwik-Wall representative about the features you want.

GENERAL SPECIFICATIONS/SERIES 642

Paired Operable Partitions

PART 1 - GENERAL

1.01 DESCRIPTION

A. General

1. Furnish and install operable partitions and suspension system.
Provide all labor, materials, tools, equipment, and services for operable walls in accordance with provisions of contract documents.

1.02 RELATED WORK BY OTHERS

- A. Preparation of opening will be by General Contractor. Any deviation of site conditions contrary to approved shop drawings must be called to the attention of the architect.
- B. All header, blocking, support structures, jambs, track enclosures, surrounding insulation, and sound baffles as required in 1.04 Quality Assurance.
- C. Prepunching of support structure in accordance with approved shop drawings.
- D. Paint or otherwise finishing all trim and other materials adjoining head and jamb of operable partitions.

1.03 SUBMITTALS

- A. Complete shop drawings are to be provided prior to fabrication indicating construction and installation details. Shop drawings must be submitted within 60 days after receipt of signed contract.

1.04 QUALITY ASSURANCE

- A. Preparation of the opening shall conform to the criteria set forth per ASTM E557 Standard Practice for Architectural Application and Installation of Operable Partitions
- B. The partition STC (Sound Transmission Classification) shall be achieved per the standard test methods ASTM E90.
- C. Noise isolation classifications shall be achieved per the standard test methods ASTM E336 and ASTM E413.
- D. Noise Reduction Coefficient (NRC) ratings shall be per ASTM C423.

1.05 PRODUCT DELIVERY, STORAGE, AND HANDLING

- A. Proper storage of partitions before installation and continued protection during and after installation will be the responsibility of the General Contractor.

1.06 WARRANTY

- A. Partition system shall be guaranteed for a period of two years against defects in material and workmanship, excluding abuse.

PART 2 PRODUCTS

2.01 ACCEPTABLE MANUFACTURERS

- A. Upon compliance with all of the criteria specified in this section, Manufacturers wishing to bid products equal to the product specified must submit to the architect 10 days prior to bidding complete data in support of compliance and a list of three past installations of products similar to those listed. The submitting manufacturer guarantees the proposed substituted product complies with the performance items specified and as detailed on the drawings.

2.02 MATERIALS

- A. Product to be top supported HUF COR Series 642 by Kwik-Wall paired panels. Contact 217-522-5553.
 1. Panels shall be nominally 4" [102] thick, to 48" [1219] in width, and hinged in pairs.
 2. Panel faces shall be laminated to appropriate substrate to meet the STC requirement in 2.04 Acoustical Performance.
 - a. Optional face material (Not all substrates are available for all STC ratings. Consult your Kwik-Wall Distributor for more information):
 - Steel (22 ga - 16 ga)
 - Non-steel
 - Medium Density Fiberboard
 - b. Horizontal Splice: Heights over 16'3" [4953] with non-steel faces require a structural splice placed at approximately 12'3" [3734] from the floor.
 3. Frames shall be of 16 gauge [1.42mm] to 14 gauge [2.0mm] steel with integral factory applied aluminum vertical edge and face protection.
Optional: Face finish shall wrap around the vertical panel edges and

provide no protective vertical face trim.

4. Vertical sound seals shall be of tongue and groove configuration, ensure panel-to-panel alignment and prevent sound leaks between panels.
 5. Horizontal top seals shall be retractable, provide 1" [25] nominal operating clearance, and exert upward force when extended. All panels, including pass door panels and lever closure panels must have retractable top and bottom seals.
Optional top seals: Horizontal top seals shall be fixed continuous contact dual 4 finger vinyl.
 6. Horizontal bottom seals shall be retractable, provide up to 2" [51] nominal operating clearance, and exert downward force when fully extended.
Optional bottom seals: Horizontal bottom seals shall be fixed continuous contact 4-finger vinyl.
 7. Horizontal trim shall be of aluminum.
 8. Low profile hinges on basic panels shall be of steel and project no more than 1/4" [6] beyond panel faces. Each pair of panels to have a minimum of three hinges.
- B. Weight of the panels shall be 7.8-13.6 lbs./sq. ft. [37.8-66.4 kg/sq.m] based on options selected.
- C. Suspension system:
1. Track shall be of clear anodized architectural grade extruded aluminum alloy 6063-T6. Track design shall provide precise alignment at the trolley running surfaces and provide integral support for adjoining ceiling, soffit, or plenum sound barrier. Track shall be connected to the structural support by pairs of minimum 3/8" [10] dia. threaded steel hanger rods. Guide rails and/or track sweep seals shall not be required.
 - a. Each panel shall be supported by one 4-wheeled carrier. Wheels to be of hardened steel ball bearings encased with molded polymer tires.
 2. Optional tracks may be used providing the height and weight limits are within manufacturers guidelines. See page 6 "Optional Tracks".
 3. Plenum closure (by others): Design of plenum closure must permit lifting out of header panels to adjust track height. Plenum closure required for optimum sound control of partition.
 4. Option (available for select layouts-consult your Kwik-Wall Distributor): The panels shall be supported by HUF COR UNISPAN by Kwik-Wall a truss and post system fabricated of steel and aluminum. Unispan is attached to the building structure for lateral support only. The load of the truss and partition is supported by end columns. The columns are connected to floor plates that distribute the load of the system at the floor.
- D. Finishes
1. Face finish shall be: (select as required):
 - a. Factory applied reinforced vinyl fabric with woven backing, weighing not less than 20 oz. per lineal yard [620 g/m]. Color shall be selected from manufacturer's standard color selector.
 - b. Standard upgrade fabrics (color shall be selected from manufacturer's standard color selector):
 - (1) Factory applied vertical ribbed carpet (N.R.C. .20)
 - (2) Factory applied stain resistant woven fabric
 - c. Optional:
 - (1) Customer Owned Materials (COM requires factory approval for manufacturing compatibility)
 - (2) Unfinished for field decoration
 - (3) Wood veneer (factory installed on trimmed models)
 - (4) High pressure laminate (factory installed on trimmed models)
 2. Exposed metal trim and seal color shall be (select from Hufcor's Standard Trim selector):
 - a. Lamb's Wool (standard)
 - b. Brown (standard)
 - c. Gray (standard)
 - d. Custom powder coated (optional upgrade for metal trim)
 3. Aluminum track shall be clear anodized
 - a. Optional upgrade:
 - (1) Custom powder coated
- E. Available Accessories/Options
1. ADA compliant pass door of the same thickness and construction as the basic panels. Pass door panel legs require bottom seals that

provide downward force to maintain stability during door operation. Pass door leaf has perimeter trim to protect face finish and to provide visual identification as required by International Building Code. Pass door leaf incorporates a self-adjusting retractable bottom seal. Face mounted stabilizing foot bolts not accepted.

- a. Automatic door closer
- b. Door lock
- c. Exit sign (consult your local code)
- d. Prepped for window
- e. Peep hole
2. Markerboards, inset or full height
3. Inset tackboards (not available with STC 56)
4. Inset eraser pocket
5. Segmented faces
6. Finished end cover
7. Pocket doors

2.03 OPERATION

- A. Panels shall be manually moved from the storage area, positioned in the opening, and seals set.
- B. Retractable Horizontal Seals
 1. Retractable horizontal seals shall be activated by a removable quick-set operating handle located approximately 42" [1067] from the floor in the panel edge.
 2. All retractable seals in each hinged panel group shall be operated simultaneously.
 3. Seal activation requires a 190 degree turn of the removable handle.
- C. Final partition closure to be by lever closure panel with expanding jamb which compensates for minor wall irregularities and provides a minimum of 250 lbs. [113.4 kg] seal force against the adjacent wall for optimum sound control. The jamb activator shall be located approximately 45" [1143] from

the floor in the panel face and be accessed from either side of the panel. The jamb is equipped with a mechanical rack and pinion gear drive mechanism and shall extend 4"-6" [102-152] by turning the removable operating handle.

D. Stack/Store Panels

1. Retract seals with removable operating handle and move to storage area. Panels may be stored at either or both ends of the track or in a pocket.

2.04 ACOUSTICAL PERFORMANCE

- A. Acoustical performance shall be tested at a laboratory accredited under the National Voluntary Laboratory Accreditation Program (NVLAP) and in accordance with ASTM E90 Test Standards. Standard panel construction shall have obtained an STC rating of ____ (select those required): 52, 54, 56
(Not all substrates are available in all STC ratings)
1. Complete, unaltered written test report is to be made available upon request.

PART 3 - EXECUTION

- A. Installation. The complete installation of the operable wall system shall be by an authorized factory-trained installer and be in strict accordance with the approved shop drawings and manufacturer's standard printed specifications, instructions, and recommendations.
- B. Cleaning
 1. All track and panel surfaces shall be wiped clean and free of handprints, grease, and soil.
 2. Cartoning and other installation debris shall be removed to onsite waste collection area, provided by others.
- C. Training
 1. Installer shall demonstrate proper operation and maintenance procedures to owner's representative.
 2. Operating handle and owners manuals shall be provided to owner's representative.

Header shown for plenum sound enclosure is one of several that may be used. See ASTM E557 Standard Practice for Archl Application & Installation of Operable Partitions for other recommendations.

Type 40 Aluminum track.
Standard for weights to 900 lbs. [408 kg]. Alternate track may be used providing the height and weight limits are within manufacturer's guidelines.

VERTICAL SECTION (No Scale)

HORIZONTAL SECTION with Vertical Trim

No Scale

Final partition closure using an Expanding Jamb (Lever Closure). Solid blocking is required at both ends to withstand 250 lbs. [113.4 kg] of lateral force.

Optional: No vertical face trim panel joint.

Optional: Wall Jamb Assembly

OPTIONS & ACCESSORIES

ELEVATION

- Expanding Jamb Closure (Lever Closure) Panel.**
Expanding jamb exerts 250 lbs. [113.4kg] force against adjacent wall for optimum sound control.
- Basic panel**
- ADA compliant pass doors** - Single 3/0 x 7/0 [914 x 2132] or 3/0 x 6/8 [914 x 2030]. Of the same construction, thickness, and finish as the basic panels. Push/pull latching handle. Options include key lock, windows, and automatic door closer. No threshold is required.
3a. Double doors ("batwing") also available.
- Exit Sign** - Recessed or surface mounted, self-illuminated.
- Work Surfaces** 4'0" [1219] high x panel width, recessed, mounted approx. 30" [762] above the floor:

- Markerboard surfaces (from manufacture's standard colors)
- Tackboards of 2mm cork board covered with vinyl from standard selections.
- Marker tray (standard on inset markerboards).
- Full height markerboard
- Recessed Eraser Pocket** (8" x 2" x 1-1/4" deep [203 x 50 x 31]).
- Lead panel** with bulb seal to prevent sound leaks at adjacent wall.
Optional: Lead panel closure to 4" [102] adjustable, full height, acoustic wall jamb assembly.

Paired Operable Partitions

STACK DIMENSIONS

The following stack depth and width dimensions are based on standard construction with vinyl faces. Optional construction and/or face covering may increase stack depth requirements.

Single Opening. Using an Expanding Jamb (Lever Closure) Panel

A = Stack Depth, 4-1/4" [108] per panel plus 1" [25]
Optional panic hardware will add to the depth of the stack.
Please contact your Hufcor distributor for assistance.

B = Stack Width:
No Pocket: Panel width + 3" [76].
Pocket without pocket doors: Panel width + min. 8" [204]

Optional - Bi-parting (with expanding jamb (lever closure) panels at both ends). (same stack formula at each end as single)

HANGER ROD LAYOUT - For Type 40 Tracks

HANGING WEIGHT

STC	Lbs./Sq. Ft.	Kg./Sq. M
43	7.8	37.8
47	8.0	38.7
49	8.5	41.2
52	9.5	46.0
54	10.9	53.2
56	13.6	66.4

OPTIONS

Optional continuous contact top (sweep) seals (Not available for STC 56)

Optional continuous contact (sweep) bottom seals (Not available for STC 56)

Optional finished end cover - provides finished panel end when partition run does not extend from wall-to-wall.

OPTIONAL TRACKS - Alternate track may be used providing the height and weight limits are within manufacturer's guidelines

Type 38 Aluminum Track
Optional for panel weights to 400 lbs. [182 kg].

Optional suspension bracket available for 5-1/4" [133] spacing.

Type 11L Steel Track

For panel weights to 900 lbs. [408 kg]. Track is of 3/16" [5] formed steel. Track trim is clear anodized aluminum. Each carrier has four steel wheels with precision ground radial bearings. Minimum dimension from the ceiling to the structure is 8" [203].
