FOR IMMEDIATE RELEASE

KWIK-WALL Company
Clinton, IL

4.30.2026; Clinton, IL – Kwik-Wall expands Operable Wall finishes to include digitally printed woodgrain steel skins.

Kwik-Wall introduces a digitally printed woodgrain steel operable wall panel finish option, partnering with Architects and distributors for launch species and colors. Introduced at Kwik-Wall's All Distributor Meeting in March 2026 as a less expensive option to high-pressure laminates and real wood veneer, woodgrain steel is a digitally printed steel skin that can be applied directly to the gypsum substrate on our panels.

Available in all STCs for both 2000 & 3000 Series panels, woodgrain steel skins can roll on the edges, providing a seamless look from panel to panel. Durable woodgrain steel skins can take the place of projects requiring more expensive wood veneer or plastic laminate at all panel heights.
