Kwik-Wall opens new 240,000 sq. ft. manufacturing facility in Clinton, IL

April 21st, 2026 – **Kwik-Wall Company** – a global leader in the manufacturing of operable walls and movable glass wall systems, announced the opening of its brand new 240,000 sq. ft. manufacturing facility in Clinton, Illinois, doubling its current manufacturing capacity and providing more flexibility in production to quickly respond to market growth conditions and to maintain Kwik-Wall's industry-leading production lead times.

From property purchase to production-ready move-in took less than 12 months and completed with no production downtime, the Clinton facility was designed to accommodate the upcoming release of the Hufcor 600 Series operable walls integrated into Kwik-Wall's product lineup after acquiring the North American rights to Hufcor's intellectual property in 2023.

This move consolidates two production facilities in Springfield IL, and one production facility in Mt. Pulaski, IL, to produce their full line of Kwik-Wall 3000 Series, 2000, and Hufcor 600 Series Operable Walls in one location.

The Clinton, IL facility includes a state-of-the-art conference center for distributor network meetings; a hands-on Luminous Glass Wall product showroom; and dedicated glass wall production equipment.
