Kwik-Wall Announces 50 & 52 STC Options for 2000 Series Operable Walls

April 29, 2026 – Kwik-Wall Company announced the availability of two new lab-certified STC levels for its 2000 Series operable walls - available now with certified 50 STC and 52 STC-rated panel construction, replacing previous top levels of 49 STC and 51 STC.

“Our continued commitment to design products that achieve increased sound control with reduced panel weights has been a top engineering priority at Kwik-Wall,

and these new 2000 Series steel-faced panel STC options weigh in at 8.6 lbs./sq. ft. for 50 STC and 9.0 lbs./sq. ft. for 52 STC, representing weight reductions of 21% for 50 STC and 19% for 52 STC panel construction from the previous 49 STC and 51 STC offerings being upgraded,” said Jake Erickson, VP Sales and Marketing.

For more information on the importance of higher STC levels with reduced panel weights for your next space division project, please contact your local [Kwik-Wall authorized distributor](#).
